

# Is the health of the U.S. at risk?

## Prevalence of health issues and their potential impact on healthcare access

SARC 5400 Final Project - Kaley Hanrahan

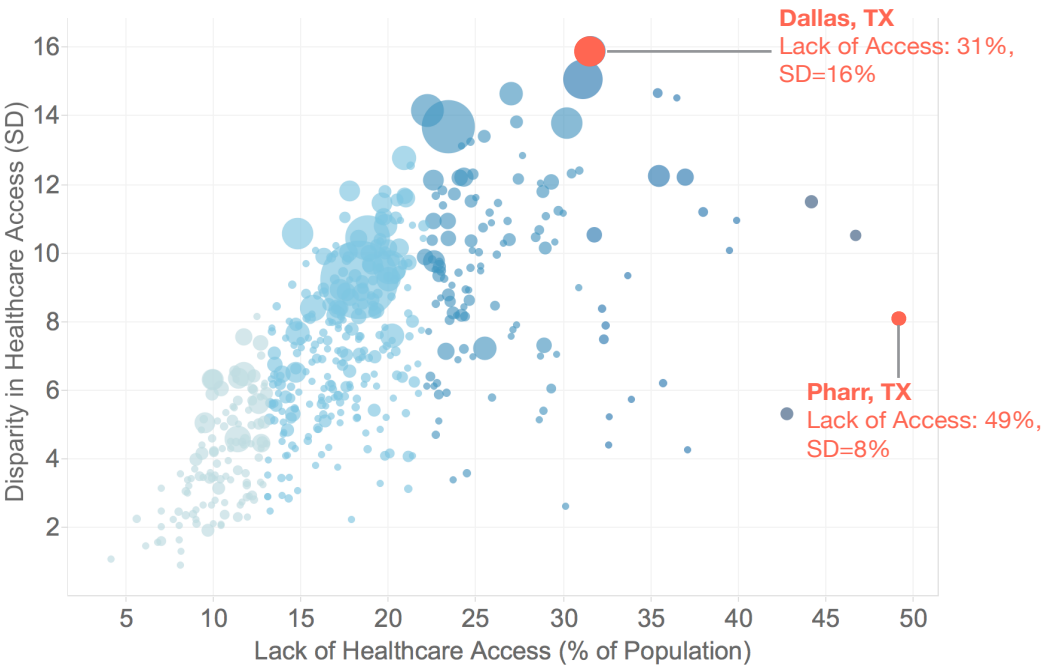

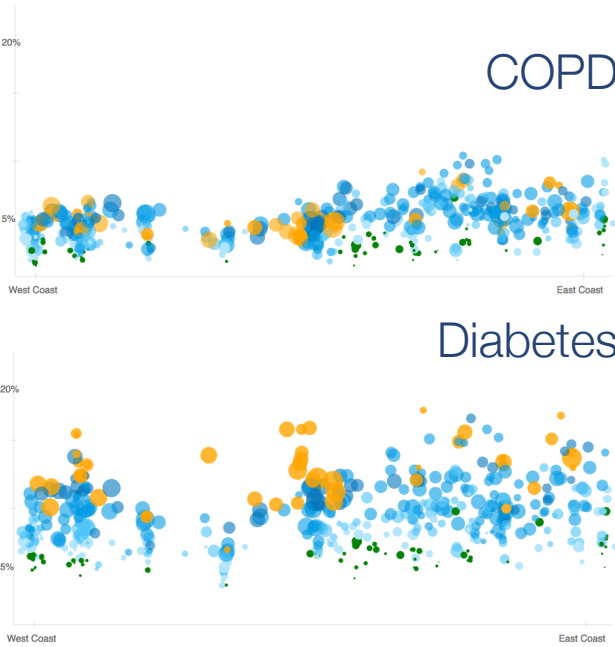

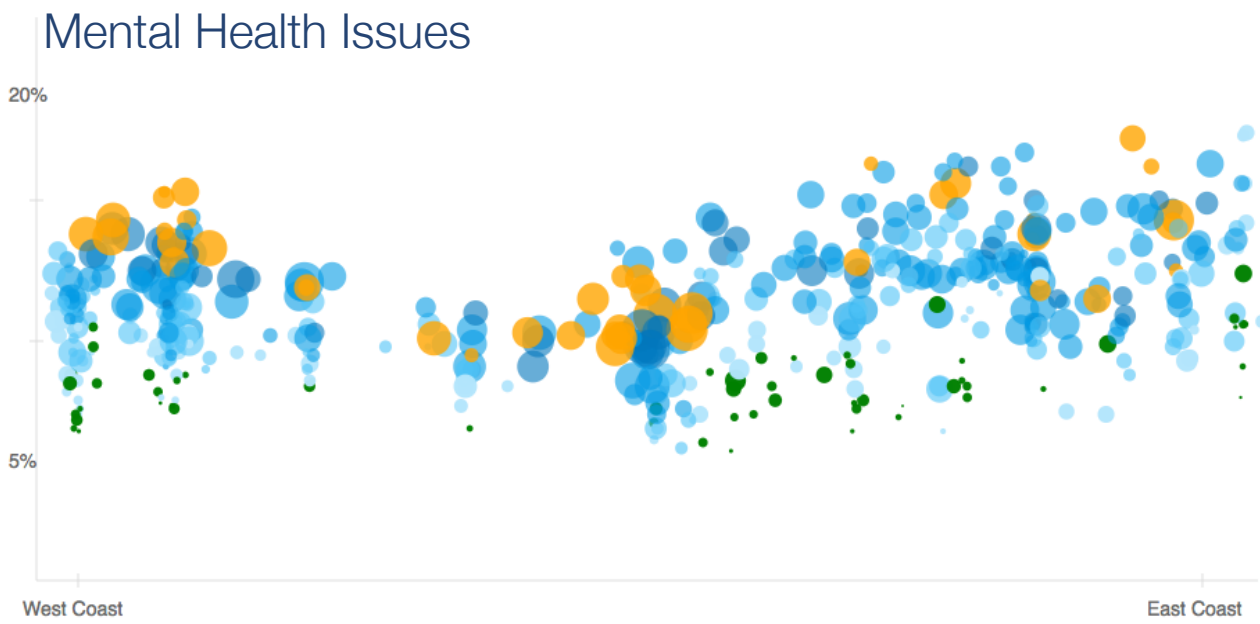

Data from the CDC's **500 cities study**

- Prevalence of health issues (age-adjusted)
- Lack of access to healthcare
- 500 most populated cities in the U.S.
- Adults ages 18 - 64 years
- ~1/3 of the total U.S. population

Percent of population with  
**Poor** Physical Health  
in U.S. Cities

## Barriers to Healthcare Access: Potential pre-existing Conditions in the Trump Era

## Disparities in Healthcare Access

City-level Healthcare Access Disparity:  
Standard Deviation of percent  
uninsured across census tracts  
within each city
